About Us

# SproutStraws.

We are a small group of people that would like to rid the world of single-use plastic. We are selling an edible rice straw that is made up of rice + tapioca. That means it's 100% biodegradable, completely break down and return to the place it first started in 100 days.

You can do your part as well by reducing the amount of single-use plastic that you use. This will help stop all of the unwanted plastic polluting our oceans, affecting millions of different species.

10 millions Straws are being used every day in Australia alone, so why not stop using plastic and paper straws and use something the animals can actually eat.

## THE PROBLEM

We produce over 300 MILLION TONS of plastic each year, 50% of which is for single-use purpose.

OVER EIGHT MILLION TONS OF PLASTIC IS DUMPED INTO OUR OCEANS EVERY YEAR.

5.25 TRILLION pieces of PLASTIC debris in our OCEANS.

1 IN 3 Species of mammals have been found entangled in marine litter.

90% of ALL seabirds have ingested plastic.

LET'S MAKE THE CHANGE!
